SQL for Data science

PROJECTS

- **Ferry ticketing System in Software Engineering,**
Developed a full-stack application using MongoDB, Node.js, Express.js, React.js, and CSS. Led the integration of API data with MongoDB and ensured seamless frontend-backend alignment for a user-friendly experience. Collaborated with the team using version control and documentation to enhance project efficiency.
- **Connected Burglar Alaram System**
It's a IOT project. We built it using Python (Tensorflow),Firebase,Raspberry Pi,Alaram
- **Recipe Finder**
Built a web application using Node.js, Express.js, MongoDB, and React.js to help users discover recipes based on available ingredients. Integrated a third-party API for recipe data and created a responsive UI for easy navigation. Collaborated with the team using Agile methodologies and version control to ensure timely delivery.
